**Subject:** Settlement is unfair to consumers

The proposed settlement by Microsoft does nothing to address or remedy the monopolistic practices that Microsoft continues to employ daily.

Please do not allow this to continue as the entire tech industry is destined to be rolled over by the money roll that Microsoft is using against smaller competitors.

Thanks to Microsofts practices, there are extremely high barriers to entry into the market for entire sectors of software, since they are using their predominance in the OS market to extend into other segments ie: WebBrowsers.
